- Android Studio
- Figma

LANGUAGES

- English (Intermediate)
- Persian (Fluent)

PROFILE

Android Developer focused on Kotlin and modern Android development. Experienced in building Android applications using MVVM and Clean Architecture, integrating REST APIs, and implementing local data storage with Room. Currently developing Meerkat Dex, a game discovery application supported by a Laravel backend, while expanding my skills in Jetpack Compose, software design patterns, testing, and UI/UX design. Also experienced in developing and maintaining web projects using WordPress and PHP.

WORK EXPERIENCE

- Android Developer**2025 - PRESENT
(Freelance & Personal Projects)
- Designed and developed Android applications using Kotlin and Java, applying MVVM and Clean Architecture.
 - Developed Meerkat Dex, a game discovery application using Jetpack Compose and modern Android development practices.
 - Integrated REST APIs using Retrofit and managed local data with Room.
 - Built and maintained a Laravel REST API and database for Meerkat Dex.
 - Developed the Meerkats website using WordPress and PHP to showcase applications and developer profiles.
 - Applied dependency injection, software design patterns, Git, and GitHub to build maintainable applications.
 - Published and maintained Android applications, including one with over 14K installs.

PROJECTS

- Meerkat Dex**2026 - PRESENT
Android game discovery app built with Kotlin, Jetpack Compose, MVVM, and Clean Architecture, integrated with a Laravel REST API.
Portfolio: [meerkats](#)
- Meerkats Website**2026 - PRESENT
Developed a WordPress website using PHP to showcase applications and developer profiles, with support for Persian and English content.
Portfolio: [meerkats](#)
- Task Manager**2024-2025
Open-source Android app
